

Gender Equity Workshop

As leaders, it is our job to learn from one another, understand each other, and work together to build systems that ensure equity in the workplace. Our Gender Equity Workshop equips each individual and team with the tools, resources and information to build a more inclusive and equitable culture for women.

Identifying the Problem and The Opportunities

We'll spend time discussing how biases shape women's experience in the workplace and understand what can be done in order to reverse them.

Lived Experiences of Bias

Participants will gain insight on real-life scenarios of bias and better understand how to identify and mitigate discriminatory actions in the workplace and in day-to-day life.

Common Barriers to Gender Equity

We'll explore topics such as unconscious bias, the biology of bias, and learned patterns that shape biased behaviors with the goal of identifying areas where we can improve.

Key Solutions

We'll share practical applications and tools for advancing gender equity in the workplace.
